

LISTING OF CLAIMS:

Please amend the claims as follows:

1. (Previously Presented) A method for complementing the inventory level of a distributor with the inventory of a manufacturer to fill an order requisition from a customer comprising the steps of:
 - providing a distributor computer capable of accessing inventory information relating to said distributor inventory and said manufacturer inventory;
 - accepting the customer order requisition by said distributor;
 - filling a the customer order requisition from at least one of said distributor inventory or said manufacturer inventory;
 - generating a customer shipping document indicating fulfillment of said customer order requisition by said distributor, wherein said customer shipping document comprises the distributor's name and logo; and
 - shipping by said distributor or said manufacturer of said customer shipping document with said filled customer order.
2. (Previously Presented) The method of claim 1, wherein said filling is from manufacturer inventory at a manufacturer location, wherein said manufacturer location is selected from one or more manufacturer locations.
3. (Previously Presented) The method of claim 2, wherein said generating step

comprises generating said shipping documents at said manufacturer location where said customer order requisition is filled.

4. (Previously Presented) The method of claim 3, wherein said generating step further comprises providing a manufacturer computer, said manufacturer computer being capable of generating said shipping documents.

5. (Cancelled)

6. (Previously Presented) The method of claim 4, wherein said customer shipping document further comprises unique customer identifier information.

7. (Previously Presented) The method of claim 6, wherein said filling step further comprises transmitting said unique customer identifier information from said distributor computer to said manufacturer computer.

8. (Previously Presented) The method of claim 1 further comprising the step of providing a manufacturer computer, said manufacturer computer being capable of providing inventory levels, prices, order acknowledgements, advanced shipping notices, and invoices to said distributor computer.

9. (Previously Presented) The method of claim 1, wherein said accessing is through

an electronic network that allows said distributor to access information relating to said manufacturer inventory.

10. (Original) The method of claim 2 wherein said filling comprises transmitting a purchase order from said distributor to said manufacturer, said purchase order being identified as for direct shipping to said customer from said manufacturer location where said order is filled.

11. (Original) The method of claim 10, wherein said filling comprises allocating said identified purchase orders to manufacturer locations capable of filling said orders.

12. (Previously Presented) A system for filling a customer order from inventory of a manufacturer or distributor comprising:

a distributor computer system capable of accessing information relating to the inventory of said distributor and said manufacturer;

program instructions for processing said order to allow fulfillment of said order from at least one of said distributor inventory or said manufacturer inventory; and

a one or more computer-generated shipping documents for transfer to said customer with said order by said distributor or said manufacturer, said shipping documents indicating that said order was filled by said distributor, wherein said shipping documents contain the distributor's name and logo thereon.

13. (Previously Presented) The system of claim 12, wherein said order is filled from

said manufacturer inventory at a manufacturer location, wherein said manufacturer location is selected from one or more manufacturer locations.

14. (Original) The system of claim 13, wherein said processing is from a manufacturer computer system, said manufacturer computer system being capable of providing inventory levels, prices, order acknowledgements, advanced shipping notices, and invoices to said distributor computer system.

15. (Original) The system of claim 14, wherein said manufacturer computer system is further capable of generating said shipping documents for transfer to said customer.

16. (Previously Presented) The system of claim 12, wherein said shipping documents comprise a packing slip, pallet posting documents and a container pack list.

17. (Original) The system of claim 12, wherein said shipping documents do not include the manufacturer logo thereon.

18. (Cancelled)

19. (Original) The system of claim 12, wherein said shipping documents contain unique customer identifier information thereon.

20. (Previously Presented) The system of claim 19, wherein said distributor computer

system is capable of transmitting said unique customer identifier information to said manufacturer.

21. (Original) The system of claim 20, wherein said transmitted unique customer identifier information comprises the name and address of said customer.

22. (Original) The system of claim 20, wherein said transmitted unique customer identifier information comprises the customer-selected delivery method.

23. (Original) The system of claim 14, wherein said distributor computer system is in electrical communication with said manufacturer computer system through an electronic data interchange network.

24. (Original) The system of claim 14, wherein said distributor computer system is capable of transmitting purchase orders to said manufacturer computer system, said purchase orders being identified as for direct shipping to said customer from said manufacturer location where said order is filled.

25. (Original) The system of claim 24, wherein said manufacturer computer system is capable of allocating said identified purchase orders to said manufacturer locations capable of filling said orders.
